Rapattoni *Magic*-Cloud AMS Release Highlights
1.3.07

Rapattoni *Magic*-Cloud AMS 1.3.07 is here! This exciting new version gives your association access to the enhancements listed below as well a number of maintenance updates.

The following enhancements have been implemented in version 1.3.07 (installed the night of 3/28/2017 for customers hosted by Rapattoni).

Member Status and Office Status Added to List Forms

The "Member List Form by List" has been updated with a new Member Status column, and the "Office List Form by List" has been updated with a new Office Status column. Both columns show the status from the Primary Association. These new columns allow users to range on member or office status for quick filtering. In addition, a count of the number of members or offices per list has been added to the header.

Member #	Last Name	First Name	Member Status	Comment	Status	Date	Amount
21794	Koehler	Jana	S		A	08/09/16	
22202	Koegle	Robert	A		A	08/09/16	
22206	Koegle	Kathleen	A		A	08/09/16	
24111	Marshall	Tyler	A		A	12/30/16	

Excel Exports Improved in PDF Converter

The PDF conversion tool has been optimized to separate data into columns more effectively, allowing for data to be managed, copied, and pasted more easily.

PayPal Payflow Payment Gateway TLS 1.2 Integration

PayPal is currently in the process of upgrading the Payflow Payment Gateway to version 1.2 of the Transport Layer Security (TLS) protocol which is used by web servers to provide secure communications over computer networks. They are scheduled to begin the TLS 1.2 update on June 30, 2017, and this version of Cloud AMS includes updates that will facilitate integration with their new TLS 1.2 interface, ensuring uninterrupted credit card processing for customers who use the Payflow Payment Gateway.

Information on PayPal's TLS 1.2 update is available at the TLS 1.2 and HTTP/1.1 Upgrade Microsite. For additional information on the TLS 1.2 protocol, click here: https://en.wikipedia.org/wiki/Transport_Layer_Security.

Rapattoni *Magic*-Cloud AMS Maintenance Report
1.3.07

This report is designed to inform Cloud AMS key contacts of software maintenance items. Please note that this report may not be a complete list and that items affecting only one Cloud AMS customer may not be included in this report.

The following items have been implemented in version 1.3.07 (installed the night of 3/28/2017 for customers hosted by Rapattoni).

Accounting

The Delete Unpaid Invoices Utility now includes PDF options which allow users to generate reports as PDF files. (RNI 170124-000137)

On the Invoice Query Form, the Invoice Date range criteria was not filtering results as intended, and the Batch field lookup was bringing up the Billing Group Query Form instead of the intended Batch Query Form. Both of these issues have been corrected. (RNI 170125-000137)

After creating a new invoice from the Cash Receipts Posting Form, the form was not refreshed to display the new invoice. This has been fixed so that the new invoice is displayed on the Cash Receipts Posting Form in this scenario. (RNI 161123-000221)

Broadcast Emails

Broadcast emails previously were not filtering properly based on Range criteria. This has been fixed so that Range criteria is applied correctly. Note that when sending broadcast emails from the Event Registration Form and Class Registration Form, the pop-up for selecting Registered, Waiting List, or All has been removed and these options can now be filtered on using the Range criteria. (RNI 170302-000285)

Users can now attach documents when using the native (non-Outlook) email system to send broadcast emails. Press F5 or click the field's "…" button to zoom and select a file. (RNI 170217-000156)

When sending broadcast emails from the Class Registration Form, non-member registrations are now included in the broadcast email list. (RNI 170302-000277)

Member & Office Information

Previously, staff users who had only query rights were not able to select tabs at the bottom of the Member Information and Office Information forms. This has been corrected and users with only query rights can view all of the information accessible from the tabs. (RNI 170306-000269)

Searches & Lookups

In the Quick Searches, users are now able to press the "Enter" key to open the highlighted member or office record directly. (RNI 161219-000112)

Quick Lookups now allow users to advance to the "OK" button by pressing the "Tab" key. Previously, users were required to click "OK" rather than using the "Tab" key. (RNI 170125-000113)

For customers who host their own Cloud AMS systems, please call Rapattoni at 866-730-7115 to schedule your upgrade and begin enjoying the many benefits of Rapattoni *Magic*-Cloud AMS 1.3.07.

A PDF version of this document can be found in the Rapattoni Magic Resource Center accessible from the support section of the Rapattoni Corporation website (www.rapattoni.com). Click on Rapattoni AMS from the Support button in the menu bar and select *Magic* Resource Center, then click the Release Highlights button.
