

Release Highlights 2.6.8

Rapattoni *Magic*-Cloud AMS 2.6.8 is coming soon! This exciting new version will give your association access to the enhancements listed below.

The following enhancements have been implemented in version 2.6.8:

- **UPDATE! Course Type Field Character Limit Increased**

UPDATE! Course Type Field Character Limit Increased

The **Course Type** field character limit has been increased from four to eight characters to better accommodate the data stored within the field.

As always, if you have any questions on these features or any other programs or processes in Rapattoni *Magic*-Cloud AMS, please don't hesitate to reach out to our support team at 1-866-730-7115 or via email to support@rapattoni.com.

Rapattoni *Magic-Cloud* AMS Maintenance Report

2.6.8

This report is designed to inform Cloud AMS key contacts of software maintenance items. Please note that this report may not be a complete list and that items affecting only one Cloud AMS customer may not be included in this report.

The following maintenance items have been implemented in version 2.6.8.

Accounting

- As announced in a previous deployment, changes were deployed to accommodate updates made by NAR but those changes were not successful. The **NRDS Settlement Import Utility** has now been updated to match the corresponding file type that is provided by NAR. This includes updating the **Settlement Date** field format to match NAR's updated requirements, as well as updating the **Refund Association Portion Amount** to reflect the correct negative value.
- Previously, the **Batch** number was being cut off when viewing the **Journal Entry Report-Detailed by Account**. This has been fixed so that the **Batch** number now displays properly.

Member Portal

- As a result of a recent update, staff members were no longer receiving email notifications when new accounts were created using the original member application setup. This issue has been resolved and staff members will now be notified as intended when new accounts are created.
- The new member application setup form was previously configured to default **Gender** to a new value labeled **Unspecified**. NAR's database can only accept three values for gender (**Male, Female, and Blank**). Therefore, the **Gender** default has been set back to **Blank**.
- When entering data on the **Personal** tab using the new member application form, users were able to enter invalid **State** codes which produced incorrect data in the Magic database. This has been corrected and the form now validates state codes entered by members.
- The Completion Date field was incorrectly sorting by the **Month** value instead of the **Most Recent** value when viewing the "Education History-Classes You've Taken" form. This has been fixed and the Completion Date field now sorts by the **Most Recent** value as intended.
