

What's New in Cloud AMS 2.9.03

Rapattoni *Magic*-Cloud AMS 2.9.03 is coming soon! This exciting new version will give your association access to the enhancements listed below.

New Member Portal Update!

- **Member Portal Association Selection** – This new drop-down option enables users belonging to multiple associations to seamlessly select the appropriate association when registering for events or classes, ensuring payments are routed to the correct association's billing.

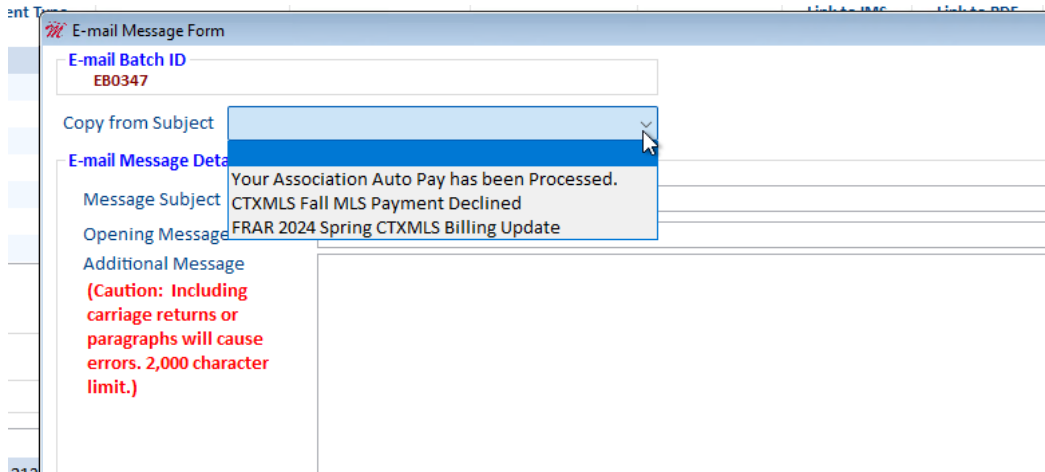

Note: The association drop-down menu will always appear on the login page for every user, regardless of how many associations they are connected to. However, once a user accesses the member portal, the drop-down will only be displayed if that user is actively associated with more than one organization.

Please note that the new Member Portal Association Selection feature is not enabled by default. To activate it, please contact Rapattoni Support.

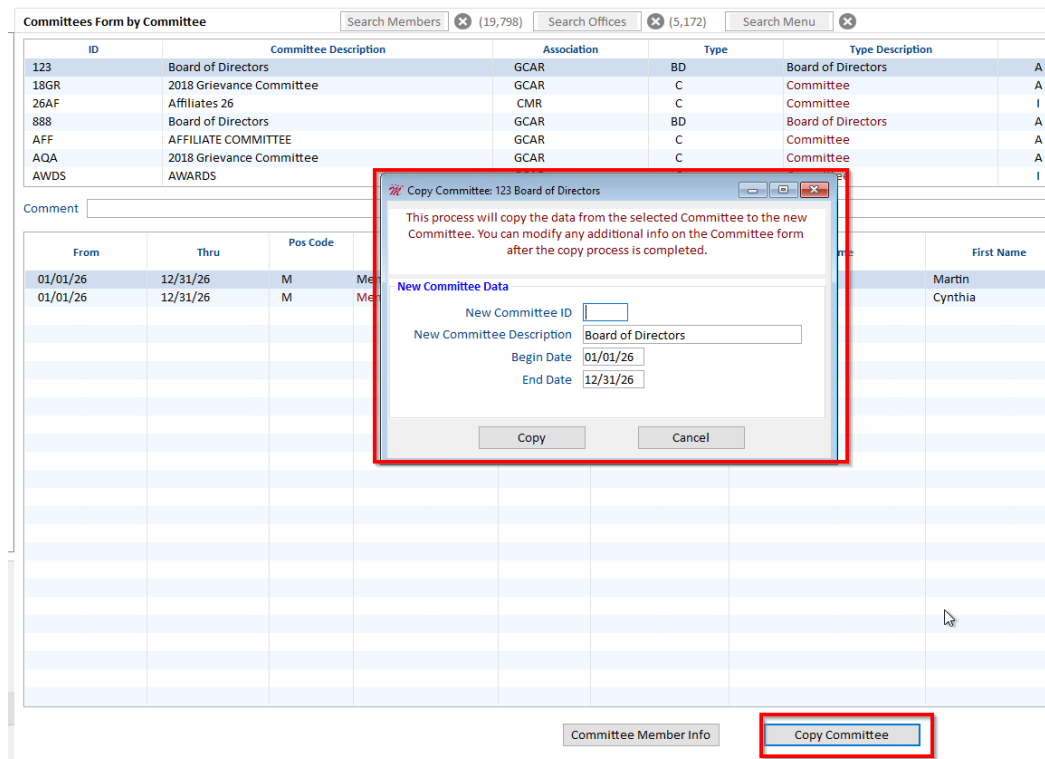

New Cloud AMS Updates!

- **Email Message Form Update** – We've updated the Email Message Form with the ability to select subject wording from an existing batch, making it quicker and easier to prepare consistent messaging when sending multiple batches.

- New Copy Committee Feature** – The new **Copy Committee** feature allows you to copy an entire committee, including all its members, with a single action.

- New Copy Batch Feature** – The new **Copy Batch** feature allows you to copy an entire batch with a single action.
